LONDON

## DESCRIPTION OF TABLES AND SUGGESTIONS FOR THEIR USE

THE tables here presented have the following ranges: mental ages — three years and no months to seventeen years and no months; chronological ages — five years and no months to sixteen years and eleven months; intelligence quotients — .30 to 1.70, within the limits of the ages specified. In the tables all decimal points are omitted. It is believed that the figures are accurate, each having been checked at least four times, once by long division and three times by the use of the slide rule. Where the third decimal figure would be 5 or more the next higher hundredth has been used.

At the top and at the bottom of each page are guides for the mental ages. In the left and right columns of each page are guides for the chronological ages. Heavy guide lines enclose the figures for the even years (e. g., 3-0) and lighter guide lines enclose the even half-years (e. g., 3-6). To find the intelligence quotient for any mental age and any chronological age, locate the column for the mental age as indicated by the guide at top or bottom of the page and find the line for the chronological age as indicated in the left or right column. The desired intelligence quotient will be found where the column and the line meet.

All the intelligence quotients for any given mental age are presented on two pages facing each other; e. g., all intelligence quotients for mental ages from three years and no months to four years and eleven months and for any chronological age from five years and no months to sixteen years and eleven months will be found on pages two and three which face each other. For this reason, whenever many intelligence quotients are to be determined, much time and labor will be saved if all cases of each year of mental age are dealt with together.

# TEST SERVICE

A DEPARTMENT CONDUCTED BY

Arthur Sinton Otis

Author of the Otis Group Intelligence Scale

*For the purpose of offering assistance and guidance  
to all who may be seeking to solve administrative  
or pedagogical problems involving  
the use of tests*

THE department of Test Service is prepared to give advice regarding the use of intelligence and educational tests and the handling of test results. Any question relating to testing that is sent to the department will be carefully considered and answered as fully as possible.

SCHOOL superintendents and teachers are invited to refer their problems to this department. Suggestions for conducting a testing program, advice on the handling of special cases, and assistance in statistical investigations will be freely given. The department will appreciate receiving reports of testing in order that it may serve as a clearing house for information as well as a bureau of coöperative research.

THE training and experience of Dr. Otis make him well qualified for the position of director of Test Service and assure the success of the department. In addition, other experts prominent in the field of psychology and education will serve as advisers who will aid in the solution of special problems that may arise.
